

BLAUER TACTICAL SYSTEMS
HIGH GEAR® IMPACT REDUCTION SUIT

WHY HIGH GEAR®?

We know real fights take place without sparring gear...but there are situations and phases in training where intelligently designed gear can provide a distinct advantage. Here are some of the training and tactical advantages of using HIGH GEAR:

MISCONCEPTIONS ABOUT PROTECTIVE PADDING

HIGH GEAR uses 'smart foams' that allow for virtually full mobility and fluid shock transfer when struck. We've designed it to transfer energy & impact. In other words...you still get hit and feel it! It's impact reduction, not impact elimination.

UNSURPASSED MOBILITY

HIGH GEAR is so streamlined that athletes from any style can work almost all their tactics & techniques without the restrictions of bulky protective equipment.

EXPERIMENTING WITH NEW TECHNIQUES

New tactics can be experimented with at full speed and under resistance.

ASSETS & INVESTMENTS

HIGH GEAR is a missing link that can help improve training intensity, refine technique under resistance, and diversify tactics.

GREATER CONTACT & POWER DEVELOPMENT

HIGH GEAR provides a distinct advantage by allowing combat athletes to generate more speed and intensity during training.

FIGHT ANALYSIS, ISOLATION & REPLICATION DRILLS

Coaches can study an opponent's tapes and then have sparring partners wearing HIGH GEAR 'replicate' the attack while the athlete finessees the counter...over & over and at full speed and with serious contact! A sparring partner without gear would never last as long.

RING GENERALSHIP

HIGH GEAR can improve confidence and therefore help generate a stronger performance.

THE POLITICS OF PREPARATION

Integrating state-of-the-art training gear sends a professional message regarding preparation.

HIGH GEAR® is impact-reduction equipment, not impact-elimination equipment. Contact training carries risk. Read the safety instructions before use.
